## JobLux 90 LED

LED 230 V 50 Hz IP 44

### APPLICATIONS

Industrial lighting

Outdoor lighting

### DESCRIPTION

Work and emergency lamp. The casing of the rechargeable, splash-proof protected work and emergency lamp, JobLux 90 LED, consists of robust, impact-resistant plastics. Protection zone II and a range of approx. 60 m. with 4 h main lamp and 120 h pilot lamp operation, it is one of the leading lamps in this field. The JobLux 90 LED has a 120° swivelling lamp head. The lamp can be switched-over between the 5.5 W xenon lamp and the LED pilot lamp. The rechargeable, maintenance-free lead gel battery can be charged at 230V AC with the integrated charging unit and is protected against total discharge and overcharging. The built-in red LED indicates the charging level of the lamp.

Temperature range: Ta = -20°C to +40°C.

Special EX version is available on request.
